

**A PPE vending machine
is the solution your
busy workplace needs.**

Coinadrink[®]
...more than just vending

**Providing protective gloves, goggles,
ear defenders, hi-vis jackets and much more.**

Cut costs, reduce waste, and make sure your team are properly protected on-site.

Did you know?
One survey found that PPE usage dropped between 25% and 60% after installation of vending machines, without any correlating reduction in its proper use.
(Creative Safety Supply)

Personal Protective Equipment (PPE) vending machines provide the means of addressing a number of Health and Safety challenges faced by companies and their managers.

There is a legal requirement for employers to provide protective and related equipment to staff who may be exposed to personal risk in the workplace. Not only does failure to provide adequate PPE present a potential physical risk to employees (sometimes life threatening), it could lead to serious legal and financial consequences if a prosecution relating to alleged negligence results.

Many employers have seen the benefits of making equipment available through on-site vending machines. Such machines are particularly suitable for providing protective gloves, goggles, ear defenders, hi-vis jackets and much more. PPE vending machines provide the means for employers to monitor usage and access to the equipment. Systems are available to monitor provision of equipment at an individual level, which both enable the employer to demonstrate that equipment has been supplied, and also help prevent casual pilfering, a common problem for many businesses.

Choices, choices

Up to 46 selections
are available from PPE
vending machines

BENEFITS OF PPE VENDING

- Access to vital PPE 24 hours a day from an unmanned and flexible solution, or set specific time periods for usage.
- A fully tailored solution that can stock and dispense a wide range of PPE.
- Monitor where your stock is going in real time and whether your staff are taking the correct amount.
- Reduce waste and cut the mounting costs involved with having to purchase replacement stock.
- A secure and hygienic way to offer PPE to your staff, with items kept inside reliable equipment.
- Automatically monitors PPE stock levels and item usage.
- Significantly reduces the risk of unaccountable equipment - potentially saving massive costs.
- Enables employers to effectively demonstrate they are meeting health and safety obligations to staff by providing easy access to PPE.
- Machines can be situated in workshops or close to point of use.
- Continual, 24/7 access to PPE for workers - no staff required.
- Accurate stock control, powerful reporting, and analytics.
- Comprehensive audit reports providing detailed information relating to time, location, staff, contractors and equipment used.

THREE EASY STEPS TO MONITORING YOUR STOCK

- 1** Staff members use their exclusive fob, tied to their account, to dispense their PPE.
- 2** When a selection is made, the reader records the vending machine number, time, date, employee reference, and the stock taken.
- 3** Fully audited / self-managed system that offers easy access to information regarding staff consumption both individually and across sites. This information is logged and retrievable should you need to access it at a later date.

GOOD TO KNOW...

- Ideal for private or public locations.
- Coinadriak don't replenish the equipment, leaving you with the freedom and flexibility to restock when and what you want to.
- Up to 4 different vending machines can be adapted to dispense PPE, with up to 46 selections available.
